Investigation 8: The Water Planet
No. 47—Notebook Master

Climate Factors—Ocean Distance B

1. How does the distance from the ocean seem to affect the temperature range of the cities?

2. and 4?

3. When do you think causes the relationships you identified in items 2 and 4?

4. When did you notice about the annual precipitation for cities close to the ocean compared to those with similar latitude and elevation farther inland?

5. What conclusion can you draw about the relationship between distance from ocean and annual precipitation?

6. What do you think causes the relationships you identified in items 2 and 4?
