GEOSCENARIO GOALS

Each student will

• participate in group work throughout the project, from the introductory tour to the final product and presentation.

• contribute important research from specialist information to the final product and presentation.

• be responsible for explaining all four project questions in the final presentation (described on notebook sheet 45).

Each team must

• create a final presentation about the story of their geoscenario and present it to their peers.

• use available evidence to support their statements.

• create a time line for their geoscenario, including at least one event provided from each team member (which he or she will find in their specialist resource materials).
