Geoscenario Work Checklist

Geoscenario name: ______________________________________

Preparing information

Review this checklist as you gather information and prepare for your presentation. Initial each step as you complete it.

____ I collected notes for the four project questions from the introduction and specialist articles.
____ I worked with my team to combine our notes.
____ I worked with my team to write notes for a presentation of our information in an engaging, effective manner.
____ I used visuals, and I referenced evidence to support statements.
____ All my writing in the final project is in my own words.
____ I understand my teammates’ parts well enough to answer questions other students may ask about any part of our geoscenario.
____ We have decided who is presenting which information.
____ We have rehearsed our presentation.

Presenting information

Use your visuals and evidence during your presentation to illustrate your ideas, and after your presentation to help answer questions.

Gaining information from other groups

When you are learning about other geoscenarios, ask questions and record information to address the four project questions. Support your answers with evidence presented by the other teams.

Reflecting on the project

On the next notebook page, write a paragraph on why you think knowing the geological story of a place is important to humans.
