Investigation 1: Sound and Vibrations

There are many words that describe sounds.

Ding, growl, and pop are a few of the words to describe sounds.

Sometimes, when you say a word for a sound, it imitates the sound itself. Bang, hoot, peep, and splat are words that imitate the sound they describe.

Ask your friends and family to help you make a list of words that describe sounds.

Write them down.

Talk about what makes those sounds.
