

INV. 1 ACTIVITY—LOOKING FOR WOOD

Explorations with wood found outdoors

Go on a walk with an adult in your yard or neighborhood.

- Look for small pieces of sticks. Bring them home.
Fill a medium size bowl about half full. Place each stick one at a time in the bowl.
Does it float or sink?
Draw the stick in your notebook or paper. If the stick floated write F next to it and if it sank write S next to it.
- Observe any trees you see. Is the wood from the trees the same? How are they the same and how are they different? Draw two different trees in your notebook.

Finding wood at home

Look around your home. Can you identify any objects in your home that may have been made by a woodworker?
