Investigation 2: Landforms

Watch a television newscast, read a newspaper or magazine, or browse the Internet for information about landforms and the natural or human-caused processes that create or change landforms. Some ideas might include floods, hurricanes and storm surges, earthquakes, landslides, and dams.

Record in the space below the following information about the news story:

- The details of the event.
- The kinds of landforms that were affected by the event.
- How the event changed or created the landform(s).
- Where the event occurred. Look up the location on a map so you can point it out to someone else.

If possible, include a copy of the newspaper or magazine article.
